

Corporate Presentation

Who are we?

Honestleon defines itself as an international commercial representation and intermediation company, present in medium and large-scale projects in the Industry, Energy and Construction sectors.

Our Business

Honestleon focuses on exploring international projects and providing them with the best service in business relations.

Intermediation

We act as "**middle men**" between client and supplier, ensuring good negotiations and terms.

Consulting

We **support** the companies in our collaboration portfolio, we are with them throughout the entire process.

Representation

Through **representation documents**, we promote the services of our partners without making decisions for them.

Relations

We establish the best commercial and professional relationships, **safe and transparent.**

Our Catalog

Below you can find the main companies that we represent or collaborate with >>>

EUTY

Waste-to-Energy solution provider.

CNTY Europe is a leading provider of **Waste-to-Energy (WtE)** solutions in Europe, headquartered in Belgium. On behalf of its parent company, **CNTY**, it is dedicated to the investment, design, construction, and operation of waste-to-energy conversion plants. Additionally, it supplies equipment such as Energize® grates, boilers, and flue gas treatment systems. It offers services ranging from equipment supply to the execution of **EPC (Engineering, Procurement, and Construction) projects**, as well as technical consulting. Some of its key projects include facilities in **Paris (France), Hai'an (China), and Hanoi (Vietnam)**.

In the face of growing environmental challenges, for over 160 years, **SUEZ** has been working to provide essential services that protect and improve quality of life. **SUEZ** provides its customers with access to water and waste management services through resilient and innovative solutions.

With its 40,000 employees in 40 countries, the Group also enables its customers to create value throughout the lifecycle of their assets and services and to manage their ecological transition alongside their end users.

MECWIDE
ENGINEERING CHALLENGES

Mecwide is a Portuguese company founded in 2009, specialized in construction and industrial maintenance, offering highly qualified services in the metallurgy sector. Based in Vila Seca, Braga, Portugal, the company has completed more than 2,000 projects and has approximately 1,700 employees and 8 manufacturing units.

Present in more than 30 countries, especially in Europe and Africa, Mecwide offers integrated solutions under the **EPC (Engineering, Procurement and Construction)** model in sectors such as oil and gas, mining and cement, industry and energy, modular systems, data centers and technical assistance.

callensvyncke

CallensVyncke is a Belgian company specializing in cogeneration and efficient industrial energy solutions. Born from the alliance between Callens and VYNCKE, it offers turnkey projects that combine thermal and electrical energy from natural gas, biomass, or waste. Its focus is on reducing emissions and improving sustainability in sectors such as food, chemicals, and paper.

It acts as an EPC (engineering, procurement, and construction) contractor for natural gas-fired cogeneration projects, with capacities ranging from 1 to over 20 MWe.

International Business Group (IBG)

IBG is a multinational holding company that operates in complementary business sectors. It manages a large portfolio of companies, creating value in the different markets in which it operates. From product transformation to turnkey solutions, it brings together several companies and brands in the **Construction, Coatings, Real Estate Development, Industry and Services sectors.**

GROW
CONSTRUCTION

Grow Engineering is a multinational company operating in the construction and engineering sectors.

Its differentiation strategy is based on the use of the most modern production processes, combined with a superior level of quality. The company guarantees special attention to detail, meeting deadlines, and always focusing on total customer satisfaction.

It is part of a group of companies, **IBG - International Business Group**, which brings together various companies and brands in the construction, real estate, services, and industrial sectors.

Neimar Engineering Company is specialized for full scale design, complex engineering, contracting, constructional and financial activities.

In 1986, in accordance with applicable laws, was founded small enterprise "Neimar". Two years later, in accordance with the changed legislation, was re-registered in the company "Neimar Engineering" based in Podgorica, since when it has been successfully carrying out construction tasks on local and international market.

EST, S.A. is a Portuguese company specializing in industrial electricity, founded on April 11, 1990. With over 30 years of experience, it offers services in **industrial electricity, automation, robotics and systems, instrumentation, electrical panels, energy, HVAC, and technical assistance and maintenance.** The company operates both nationally and internationally, with projects in countries such as Spain, Sweden, Denmark, Angola, Colombia, and Uruguay. EST is committed to providing innovative and customized technical solutions, aiming to satisfy and retain its clients.

heimsall group

Heimsall Group is a Spanish business group specializing in efficient solutions for the industrial and building sectors. It offers services in installation, repair, and maintenance of electrical systems, automation, monitoring, industrial safety, and energy efficiency. The group includes companies such as **Homsa**, **Euskoime**, and **Symen**, each focused on different technical areas. With over 31 years of experience, it serves 2,350 clients and has a team of 210 professionals. Its annual revenue is €19 million. The company is committed to innovation, safety, and efficiency in all its projects.

INGENIERÍA Y MONTAJE RÍAS BAJAS (IMRB)

Ingeniería y Montajes Rías Bajas (IMRB) is a leading Spanish company with over 30 years of experience in engineering, manufacturing, assembly, and maintenance of industrial facilities. Their services include industrial assemblies, maintenance, and the fabrication of pressure equipment and industrial boilers. IMRB holds international certifications such as ISO 9001, ISO 45001, ISO 14001, EN3834-2, and EN1090, underscoring their commitment to quality, safety, and environmental sustainability.

Lointek is a Spanish company specializing in the design, manufacture, and installation of equipment for industries such as Oil & Gas, petrochemical, and renewable energy. With over 25 years of experience, they provide customized solutions for handling fluids under extreme pressure, temperature, and corrosive conditions. Their product range includes **boilers, heat exchangers, reactors, and steam generation systems**. Lointek manages the entire value chain—from design to commissioning—ensuring comprehensive control over project execution. Strategically located near the Port of Bilbao, they offer significant logistical advantages for global operations.

AIT-STEIN

Une entreprise du Groupe GALILÉ

AIT-STEIN imagines, designs, manufactures and installs turnkey solutions for energy optimization and recovery.

Today, **AIT-STEIN** is the only partner that masters the entire renewable energy value chain from end to end: from the manufacture and installation of sustainable industrial complexes to the creation of energy recovery units, including the treatment of air and combustion gases.

Brown Fintube France Energy (BFF) is a French company specializing in the design and manufacturing of custom heat exchange solutions for industrial applications. Since 1961, BFF has provided high-quality products, including hairpin heat exchangers and vertical bayonet vaporizers, for the refining, oil, and petrochemical industries. All thermal and mechanical design, quality control, and manufacturing processes take place at its 11,500 m² facility in Thonon-les-Bains, France. The company holds certifications such as ASME Stamp U, ISO 9001, 14001, 45001, and ISO 3834-2.

EKOMT, since its establishment in 2002, has been a reliable partner of customers in the market of assembly of power engineering equipment.

Ekomt Ltd. operates in the field of thermal energy in the following industries:

- Wood industry
- Petrochemical industry
- Packaging and paper industry, paper mills.
- Metallurgical industry
- Waste treatment

SICEM COOP a.r.l. (C.I. MON) is a Cooperative Society founded in 1983 on the initiative of a group of workers, mainly **petrochemical plant maintenance workers**, who over the years have implemented different specializations, incorporating them, expanding the fields of intervention and expanding the location of their intervention both in Italy and abroad.

Metron S.A. is an international contractor specializing in the gas, oil, energy and water markets. They offer EPC solutions for **electromechanical installations and modular systems** (skids) dedicated to the transport, treatment, and measurement of gases and liquids. They also operate in the fields of aviation and water treatment, respecting international standards.

Founded in 1997, Metron operates in more than 40 countries.

**Quality
International**

Challenging Convention

Quality International is a leading global turnkey provider of total integrated solutions to the global energy and infrastructure market.

We are an ISO certified company with international accreditations, specializing in the **design, engineering, procurement, manufacturing, testing, construction, fabrication and on-site installation** of heavy engineering equipment, process modules and skids, reels and piping systems, external offshore structures and tank farms.

BOFFETTI

ALWAYS POWER AHEAD

Since 1982, **Boffetti** has been contributing to the success of its customers, operating in the sectors of **high, medium, and low voltage electrical systems**, as well as in the development of networks for public services, industries, and infrastructures.

It **designs, manufactures, and supplies** innovative products, advanced technologies, and excellent solutions for electricity distribution, facility management, and integration into modern smart grids.

Applied Energy Engineering Solutions S.L. (SIEA) specializes in projects within the energy sector, with a particular focus on **thermal and electrical energy**. The company's activities range from specialized energy consultancy to the construction of energy production facilities under a "**turnkey**" modality.

GRUPOamper
Fivemasa

Since 1980, **FIVEMASA** has been manufacturing customized solutions for the **control of environmental pollution** in all types of industries.

FIVEMASA provides the best solution to the client to respect the environment and guarantee compliance with the strictest regulations.

Founded in 1979, **Catari** specializes in the development, production and marketing of scaffolding systems and collective protection equipment.

With an incisive approach in offering innovative solutions, both in terms of products and performance, Catari adapts dynamically to market requirements and the specificities of its customers.

AQUA Ingeniería is a Spanish company specializing in technical solutions for industry, focusing on the design and assembly of scaffolding. It offers services such as thermal insulation, fireproofing, the application of refractory materials, and anti-corrosion treatments, in accordance with European standards. Its activity focuses on sectors such as petrochemicals, chemicals, steel, cement, and ceramics.

INOXMONT-VS doo is a company founded in 2008 in Ludbreg, and was born from the association of several companies with more than 20 years of international experience. The company currently has 230 employees and offers the following services:

Assembly of industrial installations and equipment.

Prefabrication and assembly of machine parts with stainless steel equipment and other materials.

Production, assembly and installation of steel industrial process equipment.

Prefabrication and assembly of steel containers.

BEND AND WELD TECHNOLOGIES

CURVASTUR S.L. is specialized in the manufacture and repair of all types of pressure parts used in steam generators of industrial, energy and/or petrochemical installations, as well as in the design, advice and technical assistance for the repair and maintenance of these components. CURVASTUR S.L. It has 3,000 m² of workshops perfectly equipped for the development of its work in Gijón (Asturias), in the north of Spain.

Solutions

Cranes: Consulting, design, manufacturing, installation and maintenance.

Steelworks: Design, engineering, manufacturing and assembly of steel structures.

Turnkey projects: Construction and industrial rehabilitation projects from A to Z.

Tips and best practices: Guidelines on best practices related to overhead and gantry cranes, steel construction and turnkey industrial projects.

Sarens is a world leader and reference in crane rental, heavy lifting and engineering transport.

Sarens is driven by the noble mission of being the benchmark in crane hire, heavy lifting and engineering transport for our customers.

With state-of-the-art equipment and value engineering, Sarens offers our customers creative and intelligent solutions to today's challenges in technical transport and heavy lifting.

CCC Srl, a leading company in the crane lifting sector in the province of Genoa, offers high-level engineering expertise and a complete range of tailor-made services to its customers throughout Italy.

MAIN SERVICES:

- **Heavy lifting**
- **Industrial handling**
- **Rental of lifting machines**
- **Lifting engineering study and design**

Lifting and logistics services company in Italy and abroad

Manutenzioni Montaggi e Programmazioni Srl (acronym MMPSrl) was founded in July 2003 and its management is composed of people with extensive experience in the engineering field, for activities carried out both in Italy and in the rest of Europe.

OUR SPECIALIZED WORK:

- Hot work: prefabrication and assembly
- Cold work: maintenance and scaffolding
- Bolt Tension - Maintenance

Global maintenance services company

PACA Services Industriels (PSI) offers Global-Services contracts aimed at reducing maintenance costs and enhancing the efficiency of industrial installations. These multi-trade contracts simplify the process by providing a single point of contact for communication.

The company specializes in maintaining industrial machinery to ensure optimal performance and also supplies parts and consumables for various installations.

With over 22 years of experience, the **FCA Group** has solid expertise in the fields of **refrigeration, heating, ventilation and air conditioning.**

Their perfect mastery of energy techniques, proximity to our customers, the availability and responsiveness of our teams allow us to offer you innovative, economical, reliable and environmentally friendly solutions.

Proman is a French recruitment agency offering temporary employment opportunities (intérim), fixed-term employment opportunities (CDD) and permanent employment opportunities (CDI). They serve various industries including logistics, construction, manufacturing, etc. Proman focuses on connecting candidates with companies while supporting them throughout the hiring process.

Yo Interim specializes in the recruitment and integration of qualified European personnel in the high-demand professions of French industry. Yo Interim offers a tailored response to your human resources requests. Based in the Pays de la Loire, we remain close to the infrastructures and companies with which we collaborate in order to provide a workforce adapted to your needs in the short, medium and long term.

An **interior design specialized showroom** for various applications, including home, office, commercial, hotel, shopping malls, etc.

As an authorized supplier; Stella is a specialized seller of various types of stone, especially marble - various types of ceramics and porcelain in various sizes - carpets and rugs - sanitary ware - custom furniture - etc. with the best quality and competitive prices

Seraset is a brand created in 2016 by Padideh Tejarat Shakiba Cooperative Company, a company founded in 2006 specializing in **construction materials**, particularly **high-quality ceramics and sanitary ware**. Its founders have been in the industry since the 1980s and have been pioneers in the sector, combining advanced technology, innovation, and premium materials to offer exclusive and sophisticated designs.
